EDUCATION

Park College Of Engineering And Technolgy

Bachelors of Technology – Computer Science And Engineering

Overall CGPA: 7.3

Coimbatore, INDIA

July 2020 - June 2024

July 2021 – June 2023

Courses: Object Oriented Programming, Web Development, Database ManagementSystem, Coding

SKILLS SUMMARY

- **LANGUAGE:** JAVA, HTML, CSS, JAVA SCRIPT, Familiar with PYTHON, SQL
- **TOOLS:** GIT, MySQL
- **PLATFORM:** GitHub, Windows, Web, VScode
- **SOFT SKILLS:** Leadership, Problem Solving, Content Writing, Planning/Prioritizing, Information processing
- **HARD SKILLS:** Computer Skills and Math Aptitude

PROJECTS

- **House price prediction:** Feb, 2023 – April ,2023
Project Link : <https://github.com/rajnishpark03/House-price-prediction>
 - Utilizing data analysis and machine learning approaches, house price prediction forecasts residential property values based on size, location, amenities, and market trends. Accurate forecasts can be produced by examining past sales data and factoring in elements such as economic indicators and property attributes. This helps real estate agents, buyers, and sellers make well-informed decisions about real estate transactions.
- **Naac work for college** December, 2023
Project Link : <https://www.pcet.ac.in/NAAC/firstpage.html>
 - I successfully developed a comprehensive NAAC webpage for my college, it ensures easy access and retrieval of college information whenever required Tech stack: HTML | CSS | JAVASCRIPT
- **Cricket scorebord (JDBC)** October, 2023
Project Link : https://github.com/rajnishpark03/cricket_worldcup_score_board_jdbc
 - Creating the functionality to carry out these actions on match data kept in a database is the first step in implementing CRUD (Create, Read, Update, Delete) procedures in a cricket scoreboard using JDBC. Users can change match scores, add new matches, get match details, and remove old records thanks to this. The system guarantees the smooth administration of cricket match data by integrating CRUD processes, giving users the flexibility to interact with and modify match data as needed.

CERTIFICATES

- **GUVI** (PythonFullstack) : <https://www.guvi.in/share-certificate/R6N6Y827769J1148WZ>
- **HACKERRANK** (CSS): <https://www.hackerrank.com/certificates/iframe/0cdd907deb62>
